

FINDING A DEPENDABLE PARTNER TO REDUCE COSTS IN YOUR COMMUNITY

The right pharmacy partner can improve operations —and your bottom line— beyond the pharmacy walls.

PHARMACY

With solid pharmacy processes in place, residents and caretakers are able to focus on other factors that contribute to holistic health, and less on organizing and distributing medications and supplements.

THE RIGHT PARTNER CAN:

- Provide alternative packaging solutions that can drastically reduce med pass time and lead to a reduction in med check-in times per month.
- Work with physicians and supplement your team by providing a holistic medication review, ensuring the most effective medications are used, assessing whether medications can be eliminated, and proactively preventing contra-indications.
- Work closely with the right technology enhancements so that you can combine the expertise of pharmacists with automated systems to ensure every dose—and the medication regimen as a whole—is precise.

EMAR/MEDICAL RECORDS

With few resources and minimal training, staff trying to navigate tech systems and electronic medical records can lead to burnout and therefore contributes to high turnover rate. With the right technology mix integrated with your process, staff can spend less time sifting through paperwork and more time engaging with residents and their family members.

THE RIGHT PARTNER CAN:

- Refine your technology approach to increase efficiency and reduce frustration by offloading mundane tasks.
- Integrate and optimize systems—such as eMAR, pharmacy records, and workflow tools—within your community so you can feel confident and prepared for your go live and beyond.
- Provide ongoing training with technology systems to allow you to utilize your tech integrations to their fullest potential, enhancing employees' ability to make timely decisions in a confident manner.

BENEFITS COORDINATION

When it comes to coordination of benefits, you need a trusted partner that not only has the best interest of your residents in mind, but one that provides timely and transparent communication, support, and advocacy when faced with challenges.

THE RIGHT PARTNER CAN:

- Provide the support your residents and families need to decode and make decisions about their plans during open enrollment periods.
- Reduce or eliminate technical roadblocks caused by prior authorizations and benefits management to ensure these don't cause disruptions to care.
- Discover the best options for residents with drugs that aren't covered.

ONGOING SUPPORT

Partners can offer guidance and education across the entire community, from high-touch, online continuing education opportunities to thorough, in-person training programs to ensure your community and staff are supported every step of the way.

THE RIGHT PARTNER CAN:

- Provide hands-on assistance and one-on-one support for new staff, allowing you to focus on reducing high employee turnover and improving quality and consistency of care.
- Offer additional and ongoing training opportunities so you can boost workflow efficiency and stay up-to-date with industry knowledge and regulations.
- Regularly check in, ensuring the tools and consultative support implemented are empowering caregivers to provide the best care for your unique community.

WHAT A PARTNERSHIP WITH MMP CAN DO FOR YOUR COMMUNITY:

25-50%

When compared to other pharmacies, our customizable solutions and streamlined processes have demonstrated a **25-50% reduction in time** per med pass.

35%

Additionally, MMP's solutions can reduce medication check-in time by an average of **35% per month**.

99.99%

MMP has a **99.99% medication accuracy** rate and hassle-free medication change management.

99%

MMP has a **99% cycle fulfillment rate**, so there's no need to worry if your medications are on their way.
